

DATA FOR **PROGRESS**

From May 14 to 27, 2026, Data for Progress conducted a survey of 624 registered voters in Onondaga County, New York using SMS and web panel respondents. The sample was weighted to be representative of registered voters by age, gender, education, race, geography, and recalled presidential vote. The survey was conducted in English. The margin of error associated with the sample size is ± 4 percentage points. Results for subgroups of the sample are subject to increased margins of error. Partisanship reflected in tabulations is based on self-identified party affiliation, not partisan registration. For more information please visit dataforprogress.org/our-methodology.

NB: subgroups with a n-size less than 40 (<40) are not shown on these cross-tabs. We choose not to display N<40 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=624 unless otherwise specified.

[18] Some local lawmakers are proposing creating legally binding requirements for Micron Technology to ensure it delivers local benefits in Central New York.

Micron would be legally required to make certain investments in job creation, environmental protection, and public infrastructure as part of its new semiconductor facility.

Do you support or oppose a proposal requiring Micron to make these investments?

DATA FOR **PROGRESS**

From May 14 to 27, 2026, Data for Progress conducted a survey of 624 registered voters in Onondaga County, New York using SMS and web panel respondents. The sample was weighted to be representative of registered voters by age, gender, education, race, geography, and recalled presidential vote. The survey was conducted in English. The margin of error associated with the sample size is ± 4 percentage points. Results for subgroups of the sample are subject to increased margins of error. Partisanship reflected in tabulations is based on self-identified party affiliation, not partisan registration. For more information please visit dataforprogress.org/our-methodology.

NB: subgroups with a n-size less than 40 (<40) are not shown on these cross-tabs. We choose not to display N<40 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=624 unless otherwise specified.

[18] Some local lawmakers are proposing creating legally binding requirements for Micron Technology to ensure it delivers local benefits in Central New York.

Micron would be legally required to make certain investments in job creation, environmental protection, and public infrastructure as part of its new semiconductor facility.

Do you support or oppose a proposal requiring Micron to make these investments?
